Letter of Intent

To whom it may concern:

It is the club's intention to operate on HF frequencies on amateur radio from federal property near dams (either below the dam for picture purposes or from visitor centers for public outreach purposes) as a special events club in order to further the knowledge of dams during the pursuit and promotion of the hobby of amateur radio.

We are seeking information regarding safe practices for the purpose of working in harmony with those who maintain the dams to prevent interference with the upkeep and daily operations of the dams. We are also seeking information about special dates for each dam so we may set up our special events stations to coincide with those dates. We would like permission to use an emblem of your choice on our QSL cards, which are cards we send out to amateur radio operators who contact us over the radio as a way to acknowledge their efforts during said special events.

We invite anyone who works with, for, or at the dams who is also interested in the hobby of amateur radio to have a look at our website, damark.org if you are curious about the club and our intent.

Thank you so much for your time!

Sincerely,

Samantha Henley KEØLMY

Club President
